A TWICE-TOLD TALE

One of Interest to Our Readers
Good news bears repeating, and when it is confirmed after a long lapse of time, even if we hesitated to believe it at first hearing, we feel secure in accepting its truth now. The following experience of a Bradford man is confirmed after three years.

H. C. Leighton, painter and carpenter, Main St., says: "I am glad to recommend Doan's Kidney Pills as I have used them for a number of years. I have been frequently troubled with backache. My kidneys were affected, too, and the secretions were highly colored and frequent in passage. The secretions burned in passage, also, Doan's Kidney Pills at these times never fail to give me prompt relief. I get Doan's at Sisco's Drug Store."

The above statement was given November 15, 1916 and on May 24, 1920, Mr. Leighton said: "I still think Doan's Kidney Pills are very good. I use them occasionally when my back and kidneys get out of order and they never fail to give me instant relief. I am glad to again recommend Doan's as I did in 1916."

Many of our villagers journeyed to Woodsville Saturday to watch the ball game between Pike and Woodsville. The Pike fans were greatly disappointed to have the game called off on account of rain for they feel that their team had a good

chance to win if the full nine innings had been played. They also believe Woodsville's last two scores, which broke the tie of two to two, would never have been made, had it not become so dark that it was impossible to see the ball. All the good sports in town are praying for another chance at Woodsville and doubtless this will be had a little later on.

Fuel Administrator Hultman advises the use of bituminous coal for domestic purposes on the ground that as in the middle western states, it will put the coal into competition with anthracite and consequently lower the price of anthracite. As yet there is no real ground for claiming there is a coal shortage in New England, the fuel administrator declares although consumers are being urged on all sides to put in their winter's supply of coal. At present, he says, there is nothing to indicate that there is much hope for a decrease in price to consumers.
